Building Hope

Guatemala

For many months, NFI has been praying and waiting for the Lord's direction concerning a possible church construction project. God has already used NFI to construct churches in both Bogota, Colombia and Nacimiento, Guatemala.

NFI is now committing to a **new church project** in Cuatro Cayos, Guatemala. Roberto, NFI's construction manager for Central & South America, has started the planning and materials negotiations. Pedro, who has been NFI's lead construction man for the past year, has agreed to work on this important project despite the considerable distance from his home.

The total cost of the new Cuatro Cayos church is estimated at \$32,000, of which 25% has been donated to date.

Previously this year

6 home renovation projects have been completed in Guatemala City. These home projects have included many new roofs and sanitary facilities for families who weekly open their homes for ministry to friends and neighbors.

Loss of sight

something unimaginable for most of us. Neighbors First has been working with a local family who's husband and father has recently lost his sight. The completed first priority was to correct dangerous electrical issues and replace a wood-burning appliance with an electric heat pump. NFI is now continuing to demonstrate God's hope and concern by constructing an addition to their modest home.

Thank you to all who donate time and resources as we build hope together !
